

# TOP FUN

A maverick fighter pilot has crashed his plane on choppy seas. He's sinking fast, and only the RNLI can save him!

Stan and the crew need YOUR help to make it there on time.

Assemble our Shannon class lifeboat following these three easy steps – then launch it into the danger zone!

## STEP 1

Cut out the lifeboat by following the dotted line around each shape using kid-safe scissors.

## STEP 2

Fold over each paper flap and apply non-toxic glue (like a glue stick).

## STEP 3

Carefully assemble the model so it matches the one below. You may need to hold the glued flaps against the paper until the glue sets.
